Category:

- Air conditioning maintenance

Advantages:

- Easy to use spray
- Fast and efficient
- Fresh mint fragrance.

Spray treatment for climate control and air conditioning units

Applications

Clima Clean is a product for cleaning, maintenance and anti-odour treatment of climate control and air conditioning units.

Clima Clean acts quickly, purifies and keeps lastingly the air conditioning unit free from any irritant smell.

Clima Clean is suitable for the treatment of heat exchangers, air heaters, car air conditioning units, air pipes, filters, air conditioning systems, evaporation towers, and, in any case, where an efficient purification treatment and an odour control are necessary.

Method of Use

Shake well the canister before using and spray at short intervals in the air intake duct of the system, with the system operating, so that the product is distributed in a uniform way. Wait a few minutes then ventilate the treated cabin or environment.

Suitable also for filter treatment after washing.

It is available also with a soft cannula to insert on the valve, for an easier usage in case of hard-to-reach parts.

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
