

Industrial Line

Ultrasuoni Detergente

Technical data sheet
n° 652 Rev. 15/05/2014

Cleaner for ultrasonic equipment

Category:

- Industrial cleaners

Applications:

- Degreases thoroughly metallic pieces in ultrasonic equipment

Advantages:

- Specific use for ultrasonic equipment

Applications

Ultrasuoni Detergente is a low-foaming product expressly developed for use in ultrasonic tanks.

It degreases thoroughly and quickly metallic surfaces contaminated by working, cutting, protective oils and other oily agents.

Thanks to its moderate alkalinity and to its content of water miscible solvents, Ultrasuoni Detergente can be used as a multifunctional cleaner for steel, iron, copper, brass and aluminium, without causing corrosion or oxidation.

Method of Use

After having put the amount of water required in the tank, add the product arriving to the desired concentration.

The latter depends upon working conditions and type of contaminants to be removed. Approximately this can vary between 10% and 50 % by weight.

At the end of washing, the pieces must be extracted and rinsed thoroughly.

FIELDS OF APPLICATION: The product is suitable for the cleaning of different materials and pieces of machines, in the following sectors:

- Mechanics
- Paper making
- Mechanical-textile
- Transports
- Maintenance departments

Technical features

pH	13
Odour	Characteristic
Colour	Colourless
Density (20°C)	1.045 g/cm ³

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
