

CIMICHILL

Technical data sheet n° 959 Rev. 18/02/2019

Instantly freeze bugs and insect pests
NON TOXIC

APPLICATIONS:

Freezing spray that neutralizes the insect in a few seconds, preventing it from moving and releasing bad odor. With its jet at $-40\text{ }^{\circ}\text{C}$, it instantly freezes the annoying and infesting bugs, spiders and crawling insects.

It can be sprayed anywhere, in the corners of the house, in the most narrow and hidden places, windows, interspaces, cracks or on the terrace. The cannula supplied allows directing the jet and freezing instantly, intervening without having to get too close.

It does not stain or smell, it is very easy to use and completely solves the problem of these unwelcome insects that are increasingly present in the environments in which we live.

METHOD OF USE:

Mount the cannula on the button, shake the bottle and spray directing the jet for a few seconds directly on the insect. In some cases it is necessary to give two or three sprays depending on the place and the size of the insect.

ADVANTAGES:

- Non-toxic
- Simple to use
- Great effectiveness
