

# MASTER CLEAN

Technical data sheet n° 110 Rev. 28/03/2014

Very Heavy Duty All Purpose Detergent

## APPLICATIONS:

Master Clean is our strongest detergent. Quickly completely and effortlessly removes all types of dirt, although difficult and very substantial like hardened sludge mixed with soil, burnt fat, tarry residues, oil, grease etc. It does not attack steel, stainless steel, iron, brass, copper, rubber, glass, concrete, epoxy coatings, synthetic seals. Do not use on delicate surfaces and light metals such as aluminium and tin. Given the power of this product it is advisable to perform a preliminary test. Do not use on aluminium and light alloys.

## METHOD OF USE:

Master Clean must be diluted with water from 5% to 30% or more of active product, depending on the type and amount of dirt to be removed. Pour and spread the diluted product on the surface to cleanse and leave for a few minutes. If necessary act on the surface with brushes, rags or other appropriate tools. Finally rinse thoroughly, preferably with water under pressure. Could be used by immersion.

**WARNING:** the product is corrosive. Use with caution. Do not use on aluminium and light alloys.

## FIELDS OF APPLICATION:

Master Clean can be used in:

- Catering and hospitality
- Community
- Cleaning and maintenance of craft workshops
- Domestic
