

# ODOR KILL PET

Technical data sheet n° 993 Rev. 03/10/2019

Odor eliminator - Completely odorless

It does not bother pets

## APPLICATIONS:

OdorKill Pet sprayed in the air, it is able to neutralize unpleasant odors and nuisances of domestic animals such as dogs, cats, reptile and volatile rodents.

Smell is not covered by a perfume, but transformed by specific active ingredients that quickly remove it from the environment.

Thanks to this mechanism of action, OdorKill Pet does not use perfumes to cover odors, guaranteeing total comfort towards pets, avoiding nuisance or allergic reactions on the part of the animal.

OdorKill Pet can be used safely in all environments, to combat animal bedding smells.

Odorkill Pet is a special blend of essential oils of vegetable origin and therefore has no harmful effect on people, animals and plants and can be sprayed in closed environments, even small ones.

## METHOD OF USE:

The product is already in solution and ready to be used.

Spray in the air, possibly upwards, to facilitate dispersion in the whole environment. Three or four sprays (6 ÷ 8 ml) are sufficient for a volume of about 30 m<sup>3</sup> (a room of about 10 m<sup>2</sup>).

**FIELDS OF USE:** • Home Use • Community • Animal shops

## ADVANTAGES:

- It does not cover odors but eliminates them
- Based on modified plant extracts
