

VIA ZANZARA

Technical data sheet n° 994 Rev. 03/10/2019

Mosquitoes repellent

APPLICATIONS:

Via Zanzara is a specific product that keeps mosquitoes away from surfaces, outdoor gatherings, exteriors and verandas.

The product acts by releasing an active ingredient based on essences of geranium and lemongrass, well known for being natural removers for mosquitoes, which persist at the same time perfuming the environment.

METHOD OF USE:

Via Zanzara is ready for use. Shake well before spraying the parts to be treated and spray abundantly on the selected areas from a distance of 20-25 cm.

The product can stain particularly delicate or very porous surfaces. If in doubt, carry out a small preliminary test.

In case of washout due to rain or washing of the treated part, spray the product again, which resists on surfaces, under normal conditions, for 3 days.

Do not use on skin and clothing.

ADVANTAGES:

- Based on natural essential oils
