Alcoholic sanitizer for footwear and leather items

Applications

Sanitizing spray for shoes, boots and footwear in general, either in natural or synthetic material, classic or sports. Thanks to its high alcohol content, it sanitizes shoe thoroughly, removing at the same time the sources of foul smelling and leaving a pleasant fresh and clean fragrance. Can also be used on other leather accessories such as gloves, belts, bags and wallets. Test the product on a small surface to check compatibility with the material to be treated.

How to use

Shake the can well and spray the product inside the shoe or otherwise outside from a distance of about 20 cm. Wait for the product to dry before putting on the garment.

Product for
professional use.
