

Sanitizing gel drain cleaner

Category:

- drain cleaner

Applicazioni:

- unblocking drains
- odor reduction

Advantages:

- rapid combined de-disgorging and anti-odor action
- gel form

Applications

Sweeping Soda is a quick gel drain cleaner that quickly clears clogged sinks, plumbing and drains. Safely for plumbing. Thanks to its strength it breaks down soaps, hair and fillings residues from washing machine drains. It also acts through stagnant water, reaching, thanks to its gel form, traffic jams by removing them, while at the same time eliminating bad odors. If used regularly and not only in the case of fillings, it cleans the drains and eliminates the nauseating rising odors, while carrying out a refreshing action. Safe for plastic pipes. The product can damage galvanized, chromed, painted, fabric and aluminum surfaces. Do not mix with acids (possible development of harmful gases).

Fields of application

Removal of occlusions from sinks, showers, bidets drains. Also ideal for draining appliances such as dishwashers and washing machines (to be dosed directly into the siphon on the wall and not into the appliance itself). Also useful for eliminating rising odors, when the pipes are partially obstructed and internally covered with residues.

IT WORKS QUICKLY WITHOUT DAMAGING THE PIPES

Method of Use

Pour the product (even in the presence of water accumulations) taking care to dose it in correspondence with the drain; wait at least 20 minutes and run hot water. The required dose is on average about 500 ml. If it is necessary to repeat the operation, follow the same instructions, mechanically helping in some cases with a probe or a suction cup.

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
