Anti-fog spray for glasses, visors and masks

Applications

Spray to speed up the transparent surfaces demisting in case of rain, exhalation or in any case in those situations in which the vapor condenses. With Fog Out the surfaces quickly become transparent again, thanks to its demisting formula.

Thanks to its convenient foam application, the product does not drip and is ideal for treating and sanitizing glasses, masks, helmet interiors, caps, visors, windshields and car interior windows treatment. Do not spray the product on hot surfaces or surfaces previously treated with other products.

How to use

Shake the can well and spray the product on the surface to be treated or on a cloth in case of small surfaces. Wipe with a soft cloth made of a material suitable for cleaning lenses and glasses. Wait 10-15 minutes for maximum effectiveness.
