Bagno San

Technical data sheet
n° 722 Rev. 07/03/2016

Detergent for all bathroom surfaces

Category:

- Detergent
- Deodorising
- Perfumed

Applications:

- General cleaning
- Daily cleaning

Advantages:

- Fresh mint fragrance
- Concentrated

Applications

Bagno San is a detergent that cleans, brightens and perfumes all the surfaces of the bathroom: tiles, sanitary ware, tubs, fittings, shower bases, coatings, etc.

Bagno San has a fresh pine and mint fragrance, is easy to use and prevents the formation of odours for a long time.

It is a highly concentrated product and allows to achieve a very high yield thanks to which it is possible to obtain up to 20 litres of ready-to-use solution.

Daily use helps to remove and prevent limescale formation.

Method of Use

For normal cleaning, dilute Bagno San at a rate of 50/60 g (a large coffee cup) per litre of water. Pass on the surfaces to be cleaned with a soft and clean absorbent cloth, possibly in cotton or non-woven fabric, while for the floors it is possible to use a common rag with a mop.

It is not necessary to rinse.

Dilution in hot water (about 50°C) leads to an increase in the activity power of Bagno San.

In case of difficult soiling, or when it is necessary to deeply sanitize and perfume, pour Bagno San directly onto a sponge and pass the surface to be cleaned. In this case, it is necessary to rinse.

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.
