### Applications:

- Removal of oils and fats also charred and encrusted

### Advantages:

- Efficacy

---

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

## Applications

Garden is a detergent suitable to remove oils, fats and processing residues, even baked or charred, from industrial equipments. It's used to clean ovens, roasters, fryers, griddles, grills, cooking hob, etc.

Garden is a highly alkaline product and it can damage aluminum,, light alloys and some types of paint. It can be safely used on steel, plastic, cast iron, marble and ceramic surfaces.

## Fields of application

The product finds its application in the food industry as well as for intensive use in kitchens (canteens, hospitals, hotels, restaurants).

## Method of Use

Garden can be used either pure or diluted with water in different proportions, depending on the amount and type of dirt to be removed.

The application can be carried out by spray, brush or immersion. Always rinse thoroughly. The use of hot water speeds up both washing and rinsing action.
