Bioactivator to eliminate bad smells from wet waste

Category:

- Biodegrading complex

Applications:

- Eliminates organic residues
- Eliminates bad odors due to bacterial contamination

Strengths:

- Versatility
- Speed of action

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Applications

Biosmel is an organic product based on selected microorganisms, capable of eliminating bad smells by accelerating the natural process of deterioration of organic substances.

Biosmel is completely biodegradable, without any side effects linked to chemical formulations and does not contain corrosive, toxic or harmful substances for the environment.

Can be used for garbage bags, in particular for wet collection, rubbish bins, waste bins, toilets, toilets (also on boats, campers, caravans), toilets, urinals, siphons, waste collection vehicles, pet litter boxes, etc.

How to use

Shake well before use. Turn the spray nozzle to the ON position. Spray the waste abundantly.

When finished, reposition the nozzle in the OFF position. Wash hands after use. Biosmel can also be used for preventive purposes, to prepare the waste bag in advance.

Used regularly, it keeps the rooms deodorized and free from contaminants

WARNINGS: Do not use strongly acidic, alkaline, disinfectant or sanitizing substances at the same time as the product as they would greatly reduce the effectiveness of the bioactivator. The optimal pH is between 6.0 and 8.0.

The optimum temperature is between 15°C and 35°C. Conservare al
