

## Industry Line

# Glossy Steel

Technical Sheet n° 071  
Rev. 03/07/2014

## Spray polish cleaner for stainless steel

### Category:

- Special products

### Applications:

- Polishes and cleans stainless steel

### Strengths:

- Effectiveness
- Practical use in spray

## Applications

Glossy Steel is a spray that allows you to clean and polish stainless steel parts very effectively in an extremely short time.

Glossy Steel also leaves a pleasant citrus scent and protects the treated parts from the oxidizing agents aggression (water, humidity, special products).

## How to Use

Shake the can well, spray from a distance of 15-20 cm., taking care to spray the product evenly on the surface to be treated. Wipe with a rag until evaporation and complete application.

In the case of large surfaces, spray directly on the cloth several times, impregnate it and work on the parts until the surface is clean, shiny and homogeneous. Once the product has been applied, it is advisable to go over the surface again with a cotton or non-woven cloth.

## Applications Fields

Glossy Steel is a formulation that can be used in various working environments, such as:

- hotel industry
- catering
- community
- Cafe
- food shops
- steel machine builders
