Rapid concentrated masonry whitener

Category:

- masonry whitener for removing mold from walls and surfaces

Applications:

- Mold removal

Strengths:

- High efficacy
- speed of use
- speed of action

Yield:

20-25 m2 with one liter.

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Applications

Metol b 52 is a masonry whitener that quickly removes mold, algae and moss stains from walls and floors of homes, gyms, swimming pools, warehouses, basements and in any other domestic or public indoor and outdoor environment.

Contains special additives capable of stabilizing and enhancing the whitening action of the active chlorine contained in very high concentrations.

Product also suitable for professional use, ideal as a masonry preparer and whitener to be used on construction sites, in building renovations and for masonry rearrangement interventions and as a pre-painting whitener

How to use

Thoroughly dust the part to be treated and apply the product on the part to be reclaimed

Leave to act for at least 10/20 minutes then wipe with a damp sponge to remove residues. On large mold stains, repeat the operation after about 20 minutes.

Rinse with water

ADVICE ON USE: Avoid contact with clothing, fabrics, wood, metals or plants.

In case of contact, wash the affected parts with plenty of water. During use, protect your hands with rubber gloves and avoid spraying on clothing.

Check in advance the compatibility with the support on a small part of the surface to be treated.

The product is ready to use, in case there are slight traces or slightly contaminated surfaces it is possible to dilute it by putting one part of Metol B52 and one part of water (50% dilution).
