

Fast stain remover for tissues

Category:

- Products for the textile sector

Applications:

- Effectively removes stains in countless occasions

Strengths:

- Effectiveness
- Practical use with spray

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Applications

Smac Tes Spray is extremely effective against greasy dirt, traces of inks, varnishes, etc.

Smac Tes Spray is essential for a perfect cleaning of both natural and synthetic tissues.

The solvents contained in its formula penetrate in the tissue, melt the dirt immediately and bring it to the surface where it is removed by a special absorbing powder.

Although having a very strong solvent power, Smac Tes Spray does not damage varnished, rubber and plastic surfaces.

How to use

Shake well the spray can before use.

Spray on the part to be treated from a distance of about 10 cm and wait a few minutes until the white absorbent coating has formed.

Once the coating has dried, brush away the residues vigorously.

At the end of these operations, in order to avoid the obstruction of the sprayer, turn it upside down and spray until only the propellant comes out.

Caution: a preliminary test on the tissue is recommended.

Scope of use

Smac Tes Spray has been developed for domestic use. However, it is ideal for professional use as well.
