Category:

- biocide
- anti-mould
- anti-algae
- antibacterial

Applications:

- for surfaces

Strengths:

- approved biocide
- quick
- whitening effect

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Applications

Anti-mold and disinfectant product for surfaces, to rapidly eliminate mould, algae and moss. Suitable for use indoors and outdoors, in private, commercial or industrial buildings. It acts as a disruptor against the very structure of algae and molds and as a disinfectant and whitener for surfaces.

It is therefore the ideal product to make the environment where we live healthier and its regular use allows you to keep the presence of harmful microorganisms under control and prevent the formation of stains.

Fields of use

The product can be used in all situations of humidity and temperatures favorable to the growth of mold and algae.

Suitable for rooms environments such as:

walls and floors of homes, gyms, changing rooms, swimming pools, warehouses, laundries, basements, cellars, attics, garages, pergolas, outdoor furnishing accessories, showers and bathroom fixtures.

It can also be used as a chlorine-based biocide disinfectant for surfaces. In the case of materials sensitive to the product (colored plasters, metals, fabrics, leather, wood, etc.) carry out a preventive test first.

How to use

Spray the product evenly over the entire surface to be cleaned and leave it to act for about 10/20 minutes. Once the established time has elapsed, wipe with a damp sponge to remove the product and the residues of algae and mold.
